PROFILE SUMMARY

Backend-focused Software Engineer specializing in scalable API development, database architecture, and high-performance web systems using Node.js, Express, PostgreSQL, and MongoDB. Built production-grade full-stack applications with authentication, caching, real-time data processing, and clean service-oriented architecture. Passionate about building reliable backend systems with strong performance and maintainability.

TECHNICAL SKILLS

Languages : JavaScript, Java
Backend : Node.js, Express.js, Spring Boot, JWT Authentication
Frontend : React.js, Next.js
Databases : PostgreSQL, MongoDB, MySQL
Tools & Platforms : Git, GitHub, Docker, Linux, Postman
Concepts : OOP, Data Structures, Database Design, API Design

PROJECTS

PinPlanet - Travel Memory Management Platform | ([SOURCE CODE](#) | [LIVE DEMO](#))

React.js | Node.js | Express.js | MongoDB | Mongoose | Context API | JWT Authentication

- Built a full-stack travel journaling platform where users can pin destinations, save travel notes, and organize places they have visited or plan to visit.
- Developed REST APIs and database models for managing user-specific locations, travel notes, and destination data using MongoDB.
- Implemented JWT-based authentication with cookie-backed sessions and protected routes for secure, personalized access.

Assets Now - Financial Data Platform | ([SOURCE CODE](#) | [LIVE DEMO](#))

React.js | Node.js | Express.js | MongoDB | Mongoose | JWT Authentication

- Built a full-stack financial platform by integrating 5+ third-party APIs for real-time market data, news, and trending asset insights across multiple asset classes.
- Implemented secure user authentication using JWT, cookies, and bcrypt, allowing users to securely manage portfolio and wishlist assets.
- Developed portfolio analytics to calculate profit/loss, returns, current value, and investment duration, helping users monitor overall investment performance.

Quiz It – Quiz Evaluation Backend | ([SOURCE CODE](#))

Java | Spring Boot | Spring Data JPA | PostgreSQL | Lombok

- Built a RESTful quiz backend for managing quiz data and evaluating user responses.
- Developed APIs to retrieve questions from PostgreSQL and compute scores based on answer validation.
- Implemented a layered Spring Boot architecture using JPA for efficient database interaction and clean service organization.

EDUCATION

Prince Institute of Innovative Technology (PIIT)

Bachelor of Computer Applications (BCA)

Greater Noida, Uttar Pradesh

June 2026

Dharam Public Senior Secondary School

Class XII (CBSE) — 92.6%

Greater Noida, Uttar Pradesh

March 2023

CERTIFICATIONS

- HackerRank: SQL (Advanced), Java, REST API, Problem Solving
- Postman API Fundamentals Student Expert Certification.
